

Use De Morgan's laws to write negations for the statements in 25–30.

29. This computer program has a logical error in the first ten lines or it is being run with an incomplete data set.

Let's assign variables to each statement.

p = This computer program has a logical error in the first ten lines

q = It is being run with an incomplete data set.

$p \vee q$

Solution: $\sim(p \vee q) \equiv \sim p \wedge \sim q$
