

- 33.** Give an example (other than Example 2.3.11) of a valid argument with a false conclusion.

If Donald Trump is a president, then pigs will fly.

Pigs aren't currently flying.

∴ Therefore Donald Trump is not a president.

p = Donald Trump is a president

q = Pigs are flying

$p \rightarrow q$

$\sim q$

∴ $\sim p$

p	q	$p \rightarrow q$	$\sim q$	$\sim p$	$\sim q \rightarrow \sim p$
T	T	T	F	F	T
T	F	F	T	F	F
F	T	T	F	T	T
F	F	T	T	T	T

Solution: The argument form is valid, but the conclusion is false.
