

10.2.16

In 14-18, assume the entries of all matrices are real numbers.

Prove that matrix multiplication is associative: If $\mathbf{A}$, $\mathbf{B}$, and $\mathbf{C}$ are any $m \times k$, $k \times r$, and $r \times n$ matrices, respectively, then $\mathbf{CAB}(\mathbf{C}) = \mathbf{A}(\mathbf{BC})$

Solution:
