

9.2.10.

Suppose there are three routes from North Point to Boulder Creek, two routes from Boulder Creek to Beaver Dam, two routes from Beaver Dam to Star Lake, and four routes directly from Boulder Creek to Star Lake. (Draw a sketch.)

- a. How many routes from North Point to Star Lake pass through Beaver Dam?
 - b. How many routes from North Point to Star Lake bypass Beaver Dam?
- a. How many routes from North Point to Star Lake pass through Beaver Dam?

$$3 \times 2 \times 2 = 3 \times 4 = 12$$

Solution: a. There're 12 routes from North Point to Star Lake that pass through Beaver Dam.

- b. How many routes from North Point to Star Lake bypass Beaver Dam?

$$3 \times 4 = 12$$

Solution: b. There're 12 routes from North Point to Star Lake that bypass Beaver Dam.
